

FISHING CLUB

Who can Join?

Students of all fishing abilities will be encouraged to join this club, as a primary component to this club will be angler education, camaraderie among students with similar outdoor interests, and environmental conservation education. All that is required is a parental permission form and a valid fishing license if you are 16 or older.

What does the Fishing Club do?

The fishing club will have weekly meetings to discuss fishing tactics and gear, as well as to plan future fishing events. The club will plan regular fishing outings 1-2 times per month for members of the club at various local bodies of water throughout the Cleveland Metroparks. At these events, students will have opportunities to enjoy the great outdoors with one another and have fun fishing. We plan to target primarily 3 types of fish species Bass, Steelhead trout, and Walleye. The majority focus will be on fishing tactics to target these species, but will have several other events to specifically target various other types of fish species.

Other Events & Outings

Fishing Outings

Fish Stocking and Preservation programs in conjunction with the Cleveland Metroparks

Seasonal fishing tournaments

Club Fishing Competitions vs. Other Schools
